

Levallois, on August 17, 2015,

To whom it may concern

I, hereby Julien Saada, CEO of the Maesa Group, declare that never Maesa or any of its subsidiaries, including p2 Kosmetik, has performed any test on animals for the products our Group has developed and put on the market.

Less than 5% of our products are made in China and even in that case, all the testings we are doing on these products are done by the most renowned laboratory of France, Germany or USA, which strictly are not testing products on animals.

Our regulatory affairs team, together with our Direction of Quality, remain at your disposal, should you need more information on this matter.

Thank you very much for your attention,

Best regards,

Julien SAADA

CEO of the Maesa Group
